SUMMARY

AI and robotics engineer with 7+ years' experience across Japan and the US. National Robot Contest Champion and co-author of 2 peer-reviewed papers, including Nature Communications. Passionate about advancing low-cost humanoid robotics to lower living costs, reduce repetitive labor, and address pressing societal needs.

EXPERIENCE

Brigham Young University (Security Department) Mar 2025-Present

AI / Software Engineer Provo, UT

- Designed and built an ML anomaly detection security system from scratch to enhance campus safety.
- Engineered maintainable backend and database architecture for a production security system.

H2L Inc. Jul 2023-Apr 2024

Public Relations / Sales / Data Analytics / AI Engineer / Robotics Engineer Tokyo, Japan

- Advanced BodySharing technology connecting human movement with humanoid robotics via muscle electrical stimulation (EMS); resolved critical skill-transfer bottlenecks to automate skilled physical labor.
- Led 20+ AI/robotics initiatives and 5+ enterprise client Proofs of Concept from concept to execution.

Simplex Inc. Sep 2019-Aug 2023

AI / Software Engineer Tokyo, Japan

- Co-managed a 100+ vendor workforce within a 4-person PM team, slashing overdue tasks by 90%.
- Delivered 20+ financial system upgrades 20–40% ahead of schedule by streamlining technical workflows.
- Launched 2+ years of weekly cross-dept AI hackathons, connecting technical teams to optimize workflows and tool sharing.

Mitani Corporation Apr 2018-Aug 2019

AI / Robotics Engineer Fukui / Tokyo, Japan

- Deployed industrial computer vision solutions across 45 enterprise clients, achieving a 24% conversion rate (vs. 10% team average).

EDUCATION

Tohoku University Mar 2018

Master of Science in Chemistry (GPA: 3.63 / 4.00) Miyagi, Japan

- Awarded 2 half-tuition scholarships (Iwakuni, ~10% rate & Nittetsu Mining) for research excellence.
- Co-authored two peer-reviewed papers (2016, 2018), including Nature Communications
- Best Discussion Award (2016): Recognized among 450 students for asking incisive, assumption-challenging research questions.

Tohoku University Mar 2016

Bachelor of Science in Chemistry (GPA: 3.02 / 4.00) Miyagi, Japan

- Awarded a half-tuition scholarship (Iwakuni, ~10% acceptance rate) for robotics achievements.

SKILLS

- **Robotics / Hardware:** SolidWorks (3D CAD), OnShape (3D CAD), ROS 2, OpenCV, Image Processing
- **AI/ML:** PyTorch, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, SciPy
- **Languages / Systems:** Python, C++, C#, Java, R, SQL (PostgreSQL/MySQL), Git, AWS, CI/CD

AWARDS & CERTIFICATIONS

- **National Robot Contest Champion**, 2012 (1st of 124 teams); mechanical designer of a walking robot
- CSWA (Certified SolidWorks Associate) · Image Processing Certification Expert · JDLA Deep Learning
